

Sensile Technologies SA – part of the WIKA Group - is a pioneer of the Internet of Things (IoT) for over 20 years. Our solutions enable customers to digitalise and optimise their logistics and reduce their CO₂ emissions.

To further boost our innovation and develop the state-of-the-art IoT we are known for, we are looking for an:

Electronic Engineer [M/F]

Are you keen on taking on new challenges and making the most of your technical skills? You enjoy working in a team, but are capable of carrying out a project completely independently?

Your mission :

- As part of our research and development team, develop tomorrow's IoT products using with your strong skills and experience in electronics, mechatronics and embedded products.
- Manage and monitor the production of these products by our subcontractors specialised in industrial electronics.

Your electronic skills and your interest in IoT, and especially low power solutions, will contribute to the success of our solutions and our customers. You are motivated to put your electronic knowledge into practice in an innovative and international company. Ideally, you already have some experience in this field.

We offer you the opportunity to work in a booming sector within a leading company, which is aware that its strength lies in the quality of its employees. You will work closely with our entire R&D team. We offer very good conditions and interesting career evolution opportunities within the WIKA Group.

Your profile :

- Electronic or microengineering degree, specialised in electronic PCB design (Altium or other)
- Proven experience in the design of low power electronic circuits (embedded systems, IoT)
- Experience in the RF domain (radio, cellular, LPWAN) a plus
- Competence in electromagnetic compatibility, EMC, radio and ATEX certification a plus
- Good understanding of the mechanical aspects of PCB integration into its housing (designed and produced by our subcontractors)
- Good knowledge of French; technical English, German and/or Italian is a plus
- Ability to analyse and implement appropriate solutions
- Good writing skills in order to specify and document development steps
- Pragmatic, meticulous and autonomous

Your personality :

- Eager to learn, like to share, communicative, methodical, conscientious, open-minded, resourceful, friendly
- Customer and result oriented

Starting date : as soon as possible

Ready for a new challenge? Send your CV and cover letter to hr@sensile.com

If you have any questions, please call Jean-Marc Uehlinger on +41 21 805 03 15.

We look forward to receiving your application.
